

# Bill Validation

Our **Bill Validation** service ensures you are only billed for the energy you use, at the rates that have been agreed with the supplier.

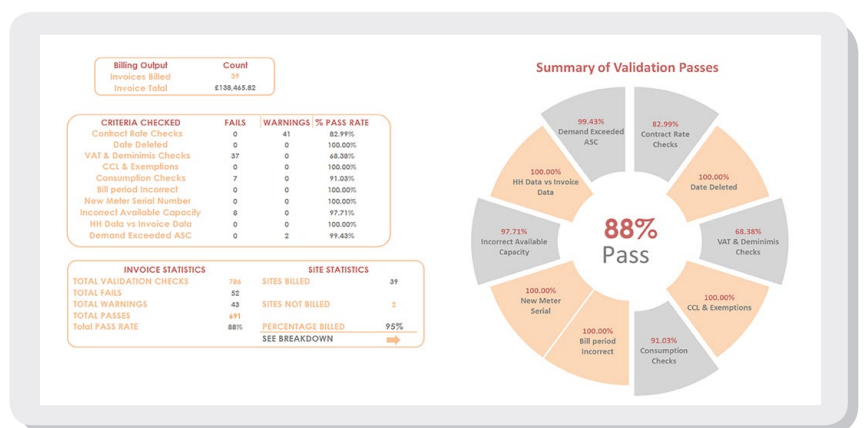

Mistakes are often made through estimated billing and incorrect contract charges which leads to many businesses overpaying by considerable amounts every year. Managing this process in-house can be a time-consuming and costly activity.

Apollo Energy's bill validation software highlights discrepancies by reviewing and recalculating each component of the invoice. It matches contract rates and consumption with invoice details. Our account managers will deal directly with suppliers to resolve incorrect invoicing, providing a full report and peace of mind.

- ✓ Allows for more informed and accurate budgeting and forecasting
- ✓ Highlights sites consuming below or in excess of their contracted volume and identifies sites that need a meter read, to avoid over-billing.

- ✓ Reduces admin costs and improves cash flow tracking
- ✓ Identifies half-hourly sites which exceed their capacity
- ✓ Accurate VAT reporting.

If you are interested in finding out how Bill Validation can benefit your business please get in touch.
